Drink Safe

Looking out for each other

A free, anonymous place to report drink spiking at UK venues, and to check a venue before you go.

FIVE THINGS THAT HELP

1. Never leave your drink unattended, even for a moment.
2. Watch your drink being prepared and carried to you.
3. If your drink tastes or smells unusual, do not drink it.
4. Stay with trusted friends and look out for each other.
5. If you feel unwell or suspect you have been spiked, tell someone immediately and seek help.

Report a venue anonymously, or check one before you go.

If it happens

Often the only sign is feeling far drunker than you should for what you have had. Dizziness or confusion can also be signs.

1. Tell bar staff. They can help you get somewhere safe.
2. Stay with people you trust. Do not leave on your own.
3. If you feel very unwell, ask staff to call for help.
