Drink Safe

Think your drink has been spiked?

Often the only sign is feeling far drunker than you should for what you have had. Dizziness or confusion can also be signs.

1. Tell bar staff now. They can help you get somewhere safe.
2. Stay with people you trust. Do not leave on your own.
3. If you feel very unwell, ask staff to call for help.

WHO CAN HELP

Emergency	**999**	Non-emergency	**101**
